

Lenart & Pete Investment

Hedge Fund Prospectus
for Investors

Lenart and Pete Investment

Lenart and Pete Investment is a company registered in the United States and operates in accordance with U.S. laws and regulations. The company securely and successfully manages its own capital, as well as client capital, across securities, foreign exchange, and commodities markets.

Lenart and Pete Investment, together with all of our partners, holds the licenses required for its operations and complies with regular annual audits and operational reviews. Lenart and Pete Investment is supervised by the U.S. Securities and Exchange Commission (SEC); the Cayman Islands-registered investment management company is supervised by the competent authority of its country of registration; and the brokerage firm is supervised by the financial regulatory authorities of Germany (BaFin), the United Kingdom (FCA), and Cyprus (CySEC).

Investment strategy and methodology

L&P's investment strategy has been developed and refined over more than 10 years, and has been successfully applied for nearly 15 years to the satisfaction of our clients. We continuously monitor financial markets, as well as global economic and political developments, enabling us to take advantage of emerging opportunities effectively. Our strategy is proprietary and based on a unique approach. It has been designed to seek high returns while keeping our investors' capital as secure as possible.

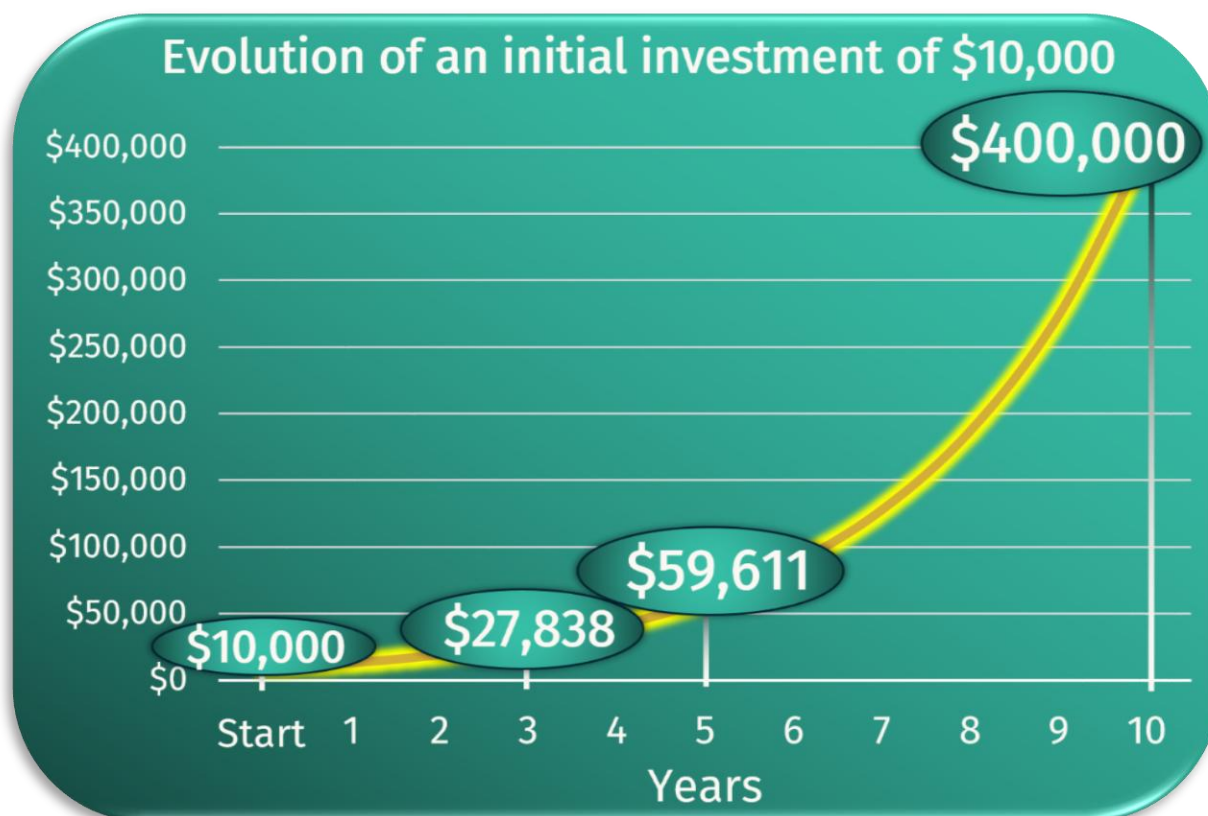

We allocate invested capital across several different products, thereby reducing risk. We invest not only in equities, but also in other financial instruments in order to achieve greater stability and security.

Our investments are primarily focused on the U.S. market; however, in order to reduce risk, in addition to U.S. equity indices, we also invest in currency pairs, including the euro, British pound, and Japanese yen, as well as commodity products such as oil, sugar, and grains. Thanks to our proprietary system, we are able to generate profits not only when prices rise, but also when they fall.

What Do We Offer You?

Building on our proven trading strategy, we offer all of our investors well-planned and predictable growth for a period of up to 10 years. Accordingly, your investment provides a 30% return in the first year, may nearly triple over 3 years, grow sixfold over 5 years, and increase up to 40 times its original value over 10 years. Please see the illustrative chart below as an example.

Upon maturity, the investment may be extended, allowing you to continue benefiting from returns over the longer term. The longer your investment remains in the fund, the greater the opportunity to benefit from the advantages of long-term growth.

For investments with a maturity of more than one year, we provide you with a detailed statement at the end of each year showing the value of your investment and the performance of your returns. This ensures that you can clearly track how your capital is growing over time.

Requirements

- Minimum investment: HUF 50,000, with no upper limit
- Minimum investment term: 1 year
- Renewable upon expiry of the investment term
